

FIRST DECENTRALIZED PLATFORM FOR TRADE, RENT AND INVEST FOR REAL ESTATE BUSINESS. A MARKETPLACE POWERED BY BLOCKCHAIN AND OWN MTRX TOKEN.

MeterX is a platform that combines existing approach of real estate rent, sales and investment in construction and empowers this business sphere with own Blockchain system, based on Ethereum smart contracts.

The platform is going to revolutionize real estate business, providing transparency, availability and own token ecosystem to ensure best user experience. Professional approach of future technologies will guarantee the attractiveness of usage and product development.

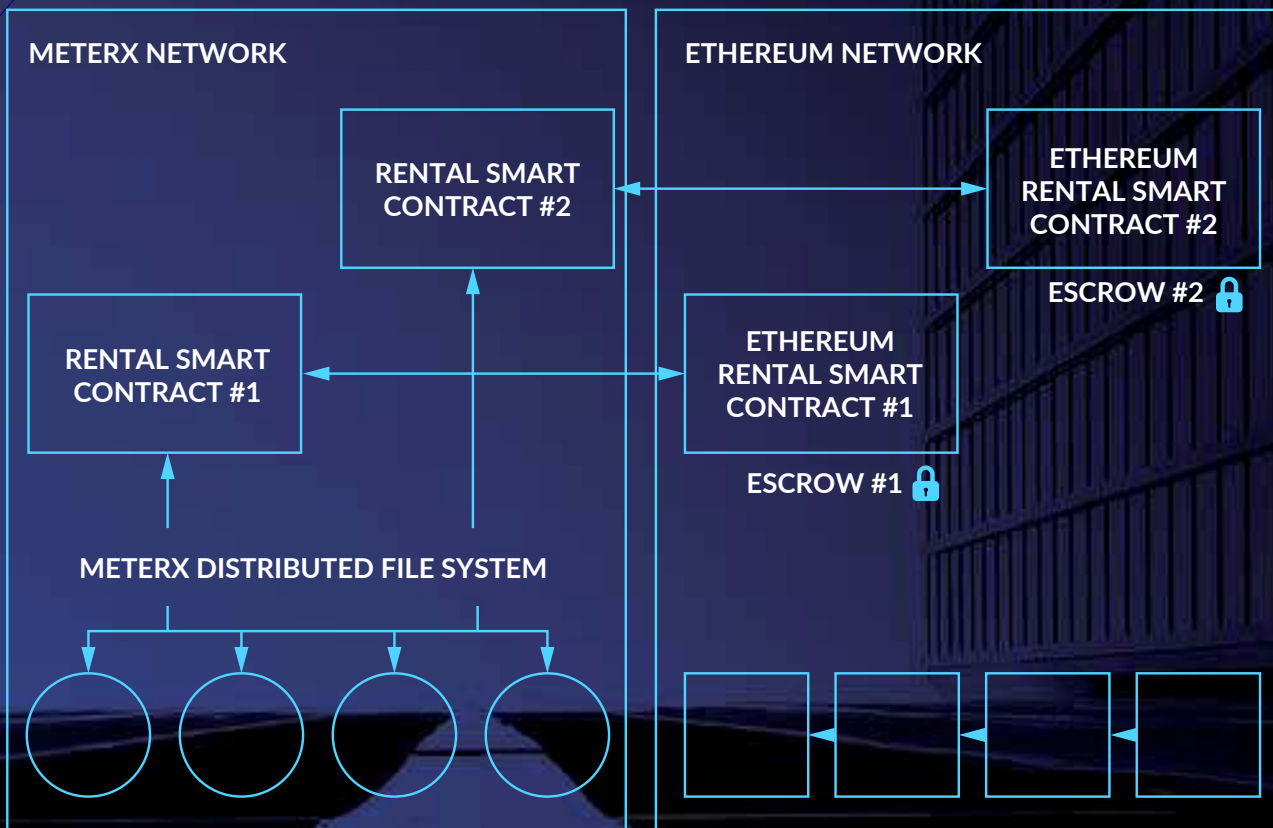

MeterX platform is going to solve the following market problems and issues:

Real estate rental - platform provides fraud regulation, transparency of transactions and eases complicated search with own filter algorithms. Excluding immense amount of intermediaries, platform provides a contract conclusion with smart contract on Blockchain with unilateral contract termination.

Real estate purchase - digital economy is driving to online in mile steps, where MeterX is available to enter without high thresholds, providing changeable history that is safe due to Blockchain usage features.

Real estate investments - MeterX platform is to provide transparency of real estate investment assets, where evaluating facilities will be transparent and transactions will not last long, with own unified registry and legal procedures of investments will eliminate cross-border restrictions.

MeterX platform uses own Blockchain system on Ethereum technology that is used for the internal transactions and purchases. MTRX tokens are available to purchase from exchange platforms and inside a platform, in convert of FIAT-currencies to the current exchange value of the token.

The use of MTRX token is going to provide a complete transparency and speed of transactions, where Ethereum-based token is used for DAO mechanisms.

Market opportunities from the recent market research provide great opportunities for real estate business sphere empowerment using Blockchain technology.

- Huge financial transactions are going to be revolutionized with unified platform, where Blockchain technology use could provide required terms of contract
- Governmental decisions are now considering to control cryptocurrency usage within regulations, which is to provide licensing for local partners of MeterX platform
- Economic point of view is described from the potential of market penetration, which is described in billions of dollars and is supported by real estate properties
- Flexible investment solutions for living spaces of local construction facilities are going to add more responsible operation service for MeterX platform, providing its users to hold their own token sale campaigns for construction projects

Thus, MeterX is a platform that is the most attractable for side investments, where all contributors are profitable from internal token usage and final token liquidity and volatility is described to be the strongest platform for real estate business environment.

The roadmap of token sale of MeterX project development milestones
